New Client Portal Aids in Credit Union Compliance

Grand Rapids, Michigan –January 28, 2009

WESCO Net, a Grand Rapids, MI-based provider of managed network solutions announced the launch of Latitude, its new client portal site. Latitude is a free service to WESCO Net managed server and firewall clients that will provide real-time access to the latest statistics and information about their WESCO Net managed devices.

According to WESCO Net, their goal is to provide an easy interface to important status information, historical and live reports, and online forms and help desk.

“One of the exciting features of this service is providing our clients online access to their firewall reports and live access to reports and information about their servers and workstations,” says Matt Sawtell, CISSP with WESCO Net. “Auditors love when a credit union has this access on demand and it helps satisfy the NCUA regulations concerning third party management oversight.”

About WESCO Net

Organized in 2002, WESCO Net is a full-service network technology solutions provider. They specialize in LAN/WAN design, implementation and management; network security; firewall management; IP telephony VOIP (voice-over-Internet protocol) solutions; records management; managed hosting solutions (facilities management), compliance and security audits (HIPAA/GLBA/SOX); high availability solutions; web site engineering, and hardware sales and support services. WESCO Net provides services to the education, retail, legal, medical, real estate, hospitality, and financial services industries as well as court systems and regional municipalities. Its financial services portfolio includes servicing over 100 credit unions across the country. Visit www.wesconet.com for more information.
