

You need a
network...

WESCONet...

Your best choice for network technology, compliance and Internet services.

WESCONet provides a full range of network technology and Internet offerings, brought to you by a team of financial industry technology professionals. Your service choices include LAN/WAN management, network security, compliance, high availability solutions, facilities management, a full range of website services, and more. Choose WESCONet and you join over 100 US credit unions that rely on them for their technology services. When the WESCONet team is on your side, you'll get more than a service provider, you'll get an extension of your staff, with the experience and expertise to deliver quality solutions at an affordable price. WESCONet...making networks work.

WHY CHOOSE WESCONet?

- **Proven technology solutions at affordable prices.** Choose WESCONet and you'll get Unified Threat Management Solutions, Managed Networks and Security, Web Hosting and Engineering, all at a price that will fit your budget.
- **Nationwide network reach:** You can count on 24X7, real-time monitoring, reporting and asset management of thousands of devices and hundreds of networks across the United States. WESCONet has the scale to handle your project—big or small.
- **A vertically integrated solution provider:** You get unparalleled response because data centers are SAS 70 certified and WESCONet-owned, not subleased, and help desks are based here in the U.S.
- **Compliance expertise:** You can rely on WESCONet industry experts for compliance consulting, policy development and implementation.
- **Certified experts:** Augment your staff expertise with WESCONet experts who maintain certifications such as: CISSP, Cisco, Microsoft, Dell, IBM, SonicWALL, PHP, Interactive Intelligence, and more.

UNIFIED THREAT MANAGEMENT SOLUTIONS

Your network is always under attack and those attacks are evolving faster than traditional firewalls are able to adjust. Protecting your network demands a new approach. WESCONet's Unified Threat Management Solution offers you a robust, agile network security package engineered to deliver the utmost protection for your network while eliminating high cost and complexity.

CONTINUOUS DATA PROTECTION SERVICES

WESCONet's tapeless backup solution, DataBP[®], provides you with state-of-art technology for continuous data protection backups as often as every 15 minutes. High-speed, disk-based Network Attached Storage ensures that you achieve rapid data recovery and multiple restore points. Available offsite data storage provides advanced protection against the physical loss of your servers or facilities.

CUSTOM, SECURE WEB APPLICATIONS

Getting your message on the `Net can be a complex and intimidating process. By partnering with WESCONet you are assured of web development and hosting excellence, and maximum impact for your corporate message. Web Experience certified experts offer you technical and marketing expertise to help craft and execute the perfect message with the right blend of technology.

WESCONet

COMPLETE CARE[®] MANAGED NETWORK SERVICES

Technology should enable your business to be more agile and effective, without being a drain on your time or your budget. WESCONet's certified experts will provide you with the expertise and oversight required to manage your technical challenges. With a selection of managed servers, managed workstations, managed WAN and LAN services, WESCONet has a program that fits your requirements at a price that makes sense.

MANAGED HOSTING SERVICES

It's no secret that applications with high availability requirements need costly highly available infrastructures. The solution? Leverage WESCONet's SAS 70 certified state-of-the-art data centers, with centralized network monitoring platforms, and backup networks. From co-location to full-on server "application to metal" management services, placing your critical applications and servers at WESCONet can get you back to business and leave the technology to us.

WEB SITE DESIGN AND DEVELOPMENT

The WESCONet web services professionals have many years of experience creating engaging web sites. Services include:

- Complete site design through site launch
- Best practice and current trend recommendations
- Reasonable standard compliance
- Web services site modifications and updates
- Optional SiteControl puts you in control of your web site content.

WEB SITE HOSTING

Hosting your website requires a lot of trust: trust with your files, trust your message, and your information. WESCONet provides you rock solid service, with state-of-the-art servers, an SAS 70 certified facility, and around the clock monitoring.

E-MAIL SECURITY

Your business e-mail is critical, but it can also be a burden due to unwanted spam and malware. WESCONet offers you e-mail security suites that deep-clean messages, block unwanted spam, and ensure message delivery. On-premise or hosted, WESCONet has you covered.

VOIP TELEPHONY SOLUTIONS

Voice Over IP can revolutionize your business communications by driving down costs, enabling sophisticated self-service applications, and improving business intelligence. To properly execute a VOIP strategy, you need to understand telephony services and networks. WESCONet offers you a broad range of experience, uniquely qualified to ensure your VOIP project is successful and within budget.

AUDIT COMPLIANCE/SECURITY SERVICES

You can take advantage of what many financial service pros already know...that WESCONet's CISSP certified security experts provide invaluable assistance in maintaining HIPAA/GLBA/SOX/PCI compliance. WESCONet Policy Packs[®] are custom tailored for your business and guaranteed to meet or exceed audit requirements. Automated internal and external security scanning services help you ensure ongoing compliance and peace of mind.

IBM[®] SYSTEM I FOR BUSINESS SALES/ INSTALLATION/HA SERVICES

IBM System *i for Business*, running on an IBM Power™ Systems server offers you a highly scalable and virus resistant architecture with a proven reputation for exceptional business resiliency. Certified WESCONet experts are ready to assist you, from sales/sizing consulting, to installation, ongoing management with I-Plan[®], data encryption services with Defense MD[®], to High Availability solutions, both hosted and on-premise.
